

The Advantages of Provent® Therapy

The **Provent** nasal device features a novel design that is applied directly to the nostrils and secured with a hypo-allergenic adhesive. As a result, Provent Therapy provides a new treatment option for Obstructive Sleep Apnoea to help you and your partner get back to sleep.

- Simple, easy to apply nasal device
- Requires no mask, machine or hoses
- Clinically proven effectiveness
- Portable and ideal for travel

When I first had Provent prescribed, my doctor warned me that it takes a little getting used to. Breathing out felt awkward at first. It took two nights, but by the third night I didn't have the awkward feeling. My doctor was right – I tried it long enough to get used to it and it worked great! I'm very happy with how Provent has improved my sleep.

Marsha

ADVANCED NIGHTLY SNORE THERAPY

Provent[®] Sleep Apnoea Therapy

Simply Effective

Provent Sleep Apnoea Therapy is a simple and effective new treatment option for Obstructive Sleep Apnoea (OSA). Provent Therapy utilises your own breathing to provide clinically proven results in the treatment of OSA. If you have been diagnosed with OSA and are noncompliant with your prescribed CPAP therapy, Provent Therapy just might be the answer for you.

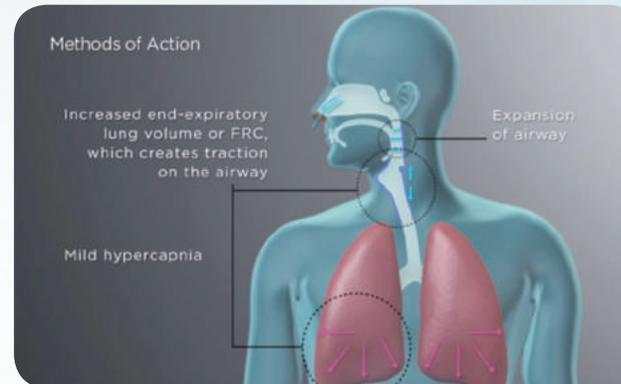

The Importance of Treatment

Untreated OSA can have a negative impact on you and your partners quality of life. Untreated OSA can lead to decreased energy levels, lack of motivation and the associated snoring can negatively impact on your partners quality of sleep.

Please discuss the medical risks of untreated Sleep Apnoea with you doctor.

How Provent Therapy Works

The exclusive valve technology in the Provent nasal device utilises your own breathing to create expiratory positive airway pressure (EPAP), which helps keep your airway open while you sleep.

Is Provent[®] for You?

Ask your Sleep Physician if Provent Therapy is right for you. Provent Sleep Apnoea Therapy is for the treatment of Obstructive Sleep Apnoea (OSA). It is clinically effective across all severities of OSA – mild, moderate and severe.

Provent Therapy in Australia can be supplied to the following patients:

- As recommended by a Sleep Physician or Specialist.
- Patients who have been diagnosed with Obstructive Sleep Apnoea, but rejected or stopped using CPAP.
- CPAP users for travel.

It is recommended that once you have started using Provent you have a follow up Sleep Study or medical review by a Sleep Specialist to confirm Provent is the best treatment for you!

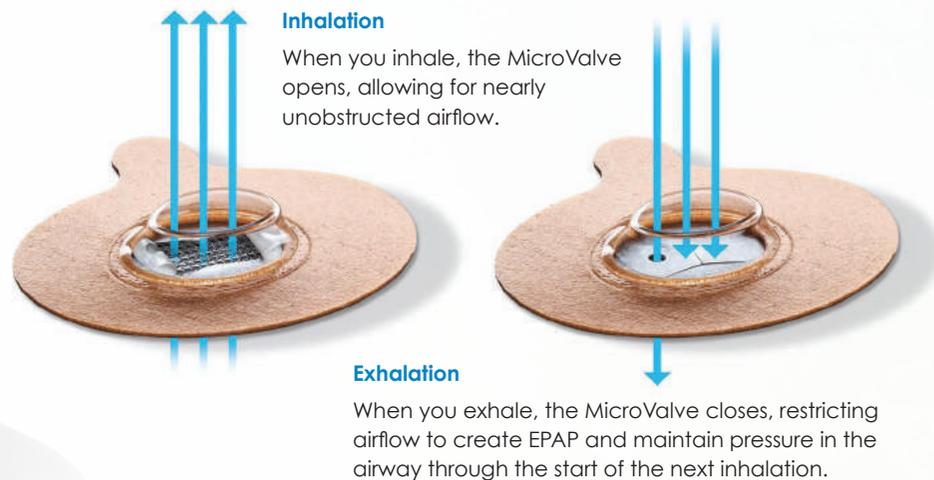

As with any OSA treatment, there are risks associated with device use and the device is not effective in all patients. For additional product and safety information, please refer to the instructions for use included with the device.

I've used CPAP, had surgeries and tried an oral device and none of them worked well for me. My sleep has definitely improved with Provent.

Bill

For over a year, my wife had tried everything and had nothing work. In just three days, Provent solved her problem – it's just unbelievable.

Carlos
